Lebanon Country Based Pooled Fund (CBPF) Lebanon aims at being strategically positioned to respond to the current humanitarian situation affecting Lebanon, and initiate life-saving activities targeting the affected local communities, refugees and other vulnerable communities alike. It focuses on strengthening the capacity of national NGOs by increasing their access to funding and ensures coordination with the relevant national and local authorities and explores ways of engagement with the private sector.

The fund has mobilized $14.4M. A total of $1.7 million was allocated for winterization needs under the first call for proposals in January 2015.

CBPF Lebanon was established in December 2014 following the decentralisation of the regional Syria fund.
