

NIGER: Timeline regarding the Humanitarian Situation in Diffa (as of 15 August 2015)

Since the declaration of a state of emergency in three states in northern Nigeria (Adamawa, Borno and Yobe) in May 2013, Niger is facing unprecedented humanitarian challenges in the region of Diffa which hosts thousands of Nigerian refugees, Nigerian returnees and Third Country Nationals. In addition, attacks by armed groups on the territory of Niger in February and June 2015 have resulted in internal displacements. Most of them are people who fled insecurity in Nigeria and internally displaced persons in situation of vulnerability putting pressure on the resources of the host communities. The main humanitarian challenges the area include food insecurity, malnutrition, limited access to basic social services and protection.
