The 2020 First Standard Allocation, based upon operational priorities identified in the COVID-19 Lebanon Emergency Appeal, will fund best-placed partners to provide targeted support to the critical life-saving needs of most vulnerable beneficiaries across all cohorts, mitigating against their increased vulnerability as a result of the pandemic and socio-economic situation. The Humanitarian Coordinator has made available up to $7,000,000 for this allocation. Sectors prioritized under this allocation were food security, WASH, health, protection and cross cutting issues.

Below is a summary overview of projects submitted by partners. These projects will now undergo the Strategic and Technical review processes (S/TR) to prioritize those best placed for funding.
