The Global Humanitarian Overview (GHO) 2020 published on 4 December 2019 announced funding requirements of \$28.8 billion to assist 108.8 million of the 167.6 million people in need in 53 countries. With various updates and changes during the first six months of the year, and the update of the Global Response Plan for COVID-19 (GHRP) on 7 May, global requirements have reached \$37.07 billion for 63 countries. The change in requirements since the end of May (+ \$310 million) is primarily due to COVID-19 related increases in Afghanistan, Ethiopia, and Colombia, as well as a decrease in Somalia of \$244 million as a result of a prioritization exercise.³

Funding trend (January – June 2020)

As of the end of June, funding for the plans included in the Global Humanitarian Overview had reached \$7.62 billion, or 21 per cent of total requirements. This is \$1.61 billion more than at the end of May, primarily due to generous funding for the COVID-19 GHRP.

An additional \$4.19 billion has been reported for activities outside the GHO or is awaiting allocation, bringing the total reported humanitarian funding to \$12.87 billion, which is \$2.67 billion higher than the \$10.20 billion reported one month ago.⁴

Funding for the GHO, including the GHRP, is approximately \$1.5 billion higher this year than at the same time in 2019 - \$7.62 billion versus \$6.12 billion. Despite much higher requirements this year, coverage is approximately the same – 21% now versus 23% at the same time last year. In terms of overall humanitarian funding, the total is currently much higher than at the end of June 2019 – \$12.87 billion as compared to \$7.62 billion. This is due to COVID-19 funding, as well as the push by many donors to disburse planned funding quickly in light of urgent and growing needs.

As of end April, the plans in the GHO aimed to provide assistance to 117.1 million of the 180.1 million people in need. This month's GHO update does not include figures for people in need and people targeted to receive aid because revisions of HRP and other inter-agency coordinated plans in the context of COVID are ongoing. An

¹ For a complete explanation of the calculation of headline figures for 2020, see page 20 of the GHO 2020.

² Global humanitarian funding includes support to organizations and activities in UN-coordinated plans, as well as reported funding for the Red Cross / Red Crescent Movement, in-kind assistance, bilateral funding and others.

³ See the GHRP Progress Report First Edition for a description of the Somalia prioritization exercise.

⁴ In the context of COVID-19, there may be some funding reported as outside the GHRP (and thus outside the GHO) due to the lack of details provided by donor or receipt agencies. It is expected that some of this funding will be attributed to the GHRP as more information is received.

Appeals figures are as reported by donors and recipient organizations to the Financial Tracking Service as of 30 June 2020. All financial data for response plans is continuously updated on fts.unocha.org. Dollar signs in this document denote United States dollars. The GHO monthly updates are produced by the Funding Trends and Resource Mobilization Unit, OCHA. For more information, please visit www.humanitarianresponse.info/appeals | www.hum-insight.info or contact ocha-ftm@un.org

estimation of the revised number of people in need due to both COVID-19 and other shocks, and of the number of people targeted for the humanitarian response, will be provided in the next update of the GHRP on 16 July. It will also be included in the July GHO monthly update issued in early August and will be available online at: <https://hum-insight.info/>.

The Rapid Response Plan for Cabo Delgado Province in Mozambique was issued on 4 June. This plan prioritizes the urgent needs of those who have been affected by the increasing violence in the province. Violence and insecurity have compounded the situation of people impacted by climatic shocks, including major cyclones and flooding in 2019, and COVID-19. The Rapid Response Plan appeals for \$35.5 million, covering the period from May to December 2020, and aims to reach over 350,000 people. Together with the COVID-19 Flash Appeal, the two plans for Mozambique seek over \$103 million to support the Government-led response to provide life-saving and life-sustaining assistance from May – December.

The international community made financial announcements for Syria and the Region on 30 June at the virtual high-level Brussels IV Conference on Supporting the Future of Syria and the Region co-hosted by European Union and the United Nations.

The announcements totalled \$5.5 billion for 2020 and close to \$2.2 billion in multi-year pledges for 2021 and beyond, for a grand total of \$7.7 billion for 2020, 2021 and beyond. This funding will help to meet the immediate and basic needs of those affected by the humanitarian crisis in Syria, support resilience efforts, and support host countries to address the impact of the protracted crisis. In addition to grants, multilateral development banks and bilateral donors pledged up to \$6.1 billion of loans. A full list of announcements is available in the [co-chairs' statement annex](#). Many donors sustained or increased their pledges, thus making the pledge result very positive considering tighter donor budgets due to COVID-19.

The [post-Brussels conference financial tracking report](#) on the fulfillment of Brussels III pledges was published on 26 June.

The UN acknowledges the generous contributions of donors who provide unearmarked or core funding to humanitarian partners, the Central Emergency Response Fund (CERF) and Country-based Pooled Funds (CBPF).

⁵ The requirements and funding are estimates and will be updated after the publication of the Venezuela HRP. / ⁶ This figure estimates year-long requirements in Yemen, including for COVID-19 activities. A final figure will be confirmed pending verification of pledges and funds already received. / ⁷ The RRP requirements and funding only include the countries not overlapping with HRPs tracked in FTS: for Burundi Regional, Rwanda, Tanzania, and Uganda are included; for DRC Regional, Angola, Republic of Congo, Rwanda, Tanzania, Uganda, and Zambia are included; for South Sudan Regional, Kenya, Uganda, and Ethiopia are included. Funding for RRP is based on contributions reported by donors and recipient organizations. Updates are ongoing. / ⁸ The requirements for the Nigeria RRP are included in the Cameroon, Chad and Niger HRPs. / ⁹ Syria 3RP figures pending finalization by UNHCR. / ¹⁰ In addition to the values presented in the table, \$380 million have been reported as funding for the GHRP, however, details regarding specific recipients or countries are not yet available.

News from the Pooled Funds

In June 2020, \$42.4 million was allocated from the Central Emergency Response Fund, including \$37.4 million from the rapid response (RR) window and \$5 million from the underfunded emergencies (UFE) window.¹¹

The Emergency Relief Coordinator (ERC) on 1 June allocated \$5 million from CERF's rapid response window for a response to Cyclone Amphan in Bangladesh and \$3 million in response to Tropical Storms Amanda and Cristóbal in El Salvador on 16 June. The ERC on 19 June allocated \$1 million for a humanitarian response to floods and landslides in Rwanda. The \$25 million COVID-19 NGO allocation for health including mental health and water, sanitation and hygiene programming in Bangladesh, the Central African Republic, Haiti, Libya, South Sudan and Sudan was allocated on 25 June. On 26 June, the ERC allocated \$15 million to Somalia for anticipatory action ahead of a projected increase in food insecurity. In addition, a UFE allocation of \$5 million to DPRK, which had been delayed due to COVID-19, was disbursed in June.

Several new Country-Based Pooled Funds (CBPF) allocation rounds were launched by Humanitarian Coordinators in June in Afghanistan (\$5 million additional funds for COVID-19); DRC (\$49 million standard allocation and \$0.5 million for Ebola in Equateur Province); Lebanon (HRP and socioeconomic consequences of COVID-19); Nigeria (\$22 million, of which \$6 million for COVID-19); and Ukraine (\$1 million).

All 18 country-level Annual Reports and the CBPF Global Report were published in June. Highlights from the Global Report include:

- CBPFs allocated a record \$1 billion to reach 27.5 million people with life-saving aid, including food, clean water, shelter and health care. Almost half went to international non-governmental organizations (NGOs), with another quarter going directly to national NGOs.
- CBPFs continued to be the largest direct source of funding for local responders on the front lines of emergency response. A total of \$332 million was channeled to national NGOs, including through sub-grants, leveraging their proximity to affected people and harnessing their local knowledge and social networks.
- Women and girls made up more than half (15.3 million) of all recipients of life-saving aid through CBPFs.
- Throughout 2019, 34 donors provided funding to 18 CBPFs. Their generosity helped more than 750 partners to save and protect the lives of people in need.
- By the end of the year, partners had implemented more than 1,600 humanitarian projects, providing food, health care, clean water, shelter and other assistance.

The first CBPF global film and video statements from the [UN Emergency Relief Coordinator](#) and the [Secretary General of the Norwegian Refugee Council](#) were also released.
