The LHF Second Standard Allocation 2021 was launched on 12th November to allocate up to $6 million under the Child Protection (CP), Gender Based Violence (GBV) and Education sectors to address previously unsupported humanitarian needs across all population groups affected by the multi-faceted crisis in Lebanon. To ensure an efficient use of LHF funding, and in support of both the Emergency Relief Coordinator’s Underfunded Priorities and the LHF’s person-centred approach, activities focus on integrated packages of support for people requiring programs of assistance tailored to their specific needs: a) children out of education or at risk of dropout, children with disabilities, working children, street-connected children and child survivors of GBV, and b) survivors of GBV and individuals at high risk of exploitation and abuse (LGBTIQ+, elderslies and persons with disabilities).

**AT A GLANCE**
- **$6 million** total allocations
