The humanitarian crisis in Yemen remains the worst in the world. Years of conflict, economic decline and institutional collapse have created enormous humanitarian needs in all sectors. The risk of large-scale famine has never been more acute. Assessments confirm that more than 16 million people will go hungry this year, and nearly 50,000 are already living in famine-like conditions. At the same time, Yemen continues to grapple with the effects of cholera, COVID-19, forced displacement, protection risks and other serious challenges.

The Governments of Sweden and Switzerland and the United Nations invite Member States to participate in the pledging event at the Ministerial level and to contribute generously to the Yemen Humanitarian Response Plan, Country-Based Pooled Fund and the Central Emergency Response Fund for 2021 and beyond. Other partners are expected to participate at the Principal level.

You are kindly requested to confirm your participation by 20 February 2021, using our online registration system. To register, please click here.
