**OVERVIEW**

- Between January and November 2020, an estimated 4.09 million people were reached on average each month with some form of humanitarian assistance.
- Around 35 per cent of the response went to areas of most acute need (hosting an estimated 42% of people in need); 31 per cent of the response went to areas with major needs (hosting an estimated 32% of people in need).
- In addition, 34 per cent of the response went to other areas, including to vulnerable populations and providing a range of life-saving activities (e.g.: vaccination campaigns, nutrition screening and water provision) to reduce excess morbidity and mortality.

**Inter-sector reach**

- People reached with humanitarian assistance on average each month

**Inter-sector needs severity**

- Inter-sector needs severity reached by severity level (Monthly Average)

**Communities reached by severity of needs**

- Communities reached

*People reached is the number of people provided with humanitarian assistance by sector partners by one or more sectors (Food & Agriculture, ERL (Direct), WASH (Life-Saving), NFI (Core), Shelter, Education, & Nutrition) taking the highest sector per community. People reached does not necessarily mean that all of their humanitarian needs are fully covered. The inter-sector and sector analysis is conducted with the HNO 2020 severity scale. Limitations:*

- The reporting of “people reached” does not convey the type, scale and quality of assistance and services people in need have received. The information does not include the Syrian Arab Red Crescent assistance and other organizations that is not reported under the HRP. The data does not reflect International Committee of the Red Cross (ICRC) assistance.
- Figures reflected are indicative and subject to change and overviews previous monthly figures as appropriate.
SECTOR OVERVIEW

- Between January and November 2020, around 3.79 million protection interventions were implemented with 61% of the protection response delivered to areas of most acute need.
- Around 3.42 million people on average received monthly food assistance with 55% of the response in areas of most acute need and a further 39% in areas of major needs.
- 76% of nutrition assistance, 85% of education assistance and 50% of the WASH response were provided to areas of most acute needs.
- There were around 10.46 million medical procedures during the reporting period, with 20% of the response in areas of most acute need and 74% in areas of major needs. Health facilities in areas, such as in governorate capitals, also provide key health services to people from high severity need areas. The same applies for protection facilities.

Reach by Sector by Severity

Food Security and Agriculture (FSA) 3.42M beneficiaries

Nutrition 1.80M beneficiaries

Non Food Items (NFIs) 3.27M beneficiaries

Shelter 936k beneficiaries

---

**Reach by severity**
- **Education**: 84%
- **WASH**: 40%
- **Early Recovery and Livelihoods (ER&L)**: 43%
- **Health**: 74%

**Interventions by severity**
- **Protection**: 67%
- **Mine Action**: 68%
- **Child Protection**: 67%
- **GBV**: 67%

---

**Notes:**
- FSA assistance includes food baskets, bread/wheat flour, cash/vouchers lifesaving and emergency food rations. As well as agricultural inputs, small-scale food production, livestock asset restoration, animal health, income generating activities, provision of services and rehabilitation of relevant infrastructure.
- Protection figures represent the total number of distinct protection interventions conducted through the sector’s prevention, response and capacity building activities. The overall protection interventions in this product also include achievements in Child Protection (CP), Gender-Based Violence (GBV) and Mine Action (MA).
- For health, given the challenges the sector faces in measuring individual beneficiaries, the indicator for the number of medical procedures is used as an aggregate indicator that serves as a proxy measure for overall progress in health service delivery in Syria (medical procedures are an aggregate indicator that includes outpatient consultations at primary health care units and hospitals, number of referral cases, mental health consultations, trauma cases, persons with disabilities supported and vaginal deliveries attended by a skilled attendant).
